

PSG IT Solutions

Student Handbook and Support Knowledge Base

1. About PSG IT Solutions

PSG IT Solutions is a technology training institute that offers job-oriented courses in cloud computing, DevOps, Python programming, Generative AI, Agentic AI and other in-demand IT skills. Every course combines live instructor-led classes, hands-on labs, assignments and capstone projects, followed by certification and placement support.

Learning modes: Live online classes and classroom (weekday and weekend batches). All live sessions are recorded and shared on the Learning Management System (LMS).

2. Course Catalogue

PSG IT Solutions currently offers the following courses. Fees are in Indian Rupees (INR) and include live classes, lab access, recordings and the course completion certificate.

DevOps with AWS

Duration: 16 weeks. Fee: 45000 INR. Mode: Live online / classroom. Prerequisites: basic Linux and one programming language. Topics: Git, Linux, Jenkins, Docker, Kubernetes (EKS), Terraform, Ansible, AWS core services (EC2, S3, VPC, IAM, RDS, CloudWatch), CI/CD pipelines and monitoring. Includes 3 capstone projects, resume building, mock interviews and placement support.

DevOps with Azure

Duration: 16 weeks. Fee: 45000 INR. Mode: Live online / classroom. Prerequisites: basic Linux and one programming language. Topics: Git, Docker, Kubernetes (AKS), Terraform, Azure DevOps Pipelines, Azure core services (VMs, Storage, VNet, Azure AD, Monitor), CI/CD and infrastructure as code. Includes 3 capstone projects and placement support.

DevOps with GCP

Duration: 16 weeks. Fee: 45000 INR. Mode: Live online / classroom. Prerequisites: basic Linux and one programming language. Topics: Git, Docker, Kubernetes (GKE), Terraform, Cloud Build, GCP core services (Compute Engine, Cloud Storage, VPC, IAM, Cloud Monitoring), CI/CD and infrastructure as code. Includes 3 capstone projects and placement support. Helps prepare for the Google Cloud Associate Cloud Engineer exam.

Python Programming (Beginner to Advanced)

Duration: 8 weeks. Fee: 15000 INR. Mode: Live online / classroom. Prerequisites: none. Topics: Python basics, data structures, functions, OOP, file handling, modules, error handling, working with APIs, automation scripts and a final project. Includes 40 hours of live classes and weekly assignments.

Generative AI (GenAI)

Duration: 10 weeks. Fee: 35000 INR. Mode: Live online / classroom. Prerequisites: Python basics. Topics: how large language models work, prompt engineering, OpenAI API, embeddings, vector

databases, Retrieval Augmented Generation (RAG), LangChain, fine-tuning basics and building GenAI applications with Streamlit. Includes 2 hands-on projects.

Agentic AI with LangGraph

Duration: 8 weeks. Fee: 30000 INR. Mode: Live online / classroom. Prerequisites: Python and basic GenAI or LLM knowledge. Topics: AI agents, tool calling, LangGraph nodes, edges, state and conditional routing, multi-agent workflows, memory and checkpointers, RAG inside agents, human-in-the-loop and deploying agentic applications. Includes a capstone project such as a student-support chatbot.

Data Science with Python

Duration: 12 weeks. Fee: 35000 INR. Mode: Live online / classroom. Prerequisites: Python basics and high-school mathematics. Topics: NumPy, Pandas, data visualisation, statistics, Scikit-learn, machine learning models and model deployment.

Docker and Kubernetes

Duration: 6 weeks. Fee: 20000 INR. Mode: Live online. Prerequisites: basic Linux. Topics: containers, Docker images and networking, Docker Compose, Kubernetes architecture, pods, deployments, services, ingress, Helm and troubleshooting.

Terraform and Infrastructure as Code

Duration: 4 weeks. Fee: 12000 INR. Mode: Live online. Prerequisites: basic cloud knowledge (AWS, Azure or GCP). Topics: Terraform basics, providers, state, modules, workspaces and multi-cloud automation.

Linux and Shell Scripting

Duration: 4 weeks. Fee: 8000 INR. Mode: Live online / classroom. Prerequisites: none. Topics: Linux commands, file system, users and permissions, networking basics, package management and Bash scripting.

Full Stack Development with Python

Duration: 14 weeks. Fee: 30000 INR. Mode: Live online / classroom. Prerequisites: Python basics. Topics: HTML, CSS, JavaScript, Flask or Django, REST APIs, SQL databases, Git and deployment.

More courses are added regularly. For any course not listed here, contact the support team.

3. Enrolment and Batches

- To enrol, fill the admission form, choose a batch and pay the course fee (or the first instalment).
- After enrolment every student receives a student ID in the format STU1234, which is used for payment and account queries. Keep this ID safe.
- Batch types: weekday batches (morning or evening) and weekend batches.
- Batch switching: a student can switch batches once, within the first 2 weeks of the course, subject to seat availability.

- Demo classes: free demo sessions are available before enrolment. Contact the support team to book one.

4. Fees and Payment Information

How to pay

- Payment modes: UPI, debit card, credit card, net banking and bank transfer, through the online Payment Gateway.
- Full payment: pay the complete fee at the time of enrolment.
- Instalments: the fee can be paid in 2 or 3 instalments. The first instalment is paid at enrolment and the rest before the due dates shown on the student account.
- A receipt is emailed after every successful payment.
- Late payment: if an instalment is not paid within 7 days after its due date, LMS access may be paused until the payment is completed. Access is restored once the payment is received.

Payment status meanings

- PAID: the payment was received successfully.
- PENDING: the payment is due or is still being processed.
- FAILED: the payment did not complete. If money was deducted from the bank account for a failed payment, it is automatically reversed by the bank within 5 to 7 working days. The student can retry the payment.

Checking your own payment details

A student's personal payment details, such as pending fees, due dates, paid amount and failed transactions, are stored in the payment records database. To check them, share the student ID (for example STU1001) with the support assistant. Payment details are shown only for the student ID provided.

Duplicate or wrong payments

If a student is charged twice for the same course, the extra amount is refunded to the original payment method within 7 to 10 working days after the support team verifies the duplicate transaction.

5. Refund Policy

Refund eligibility

- Refund requests are accepted within 7 days of enrolment.
- The student must have attended no more than 2 live sessions of the course.
- An administrative fee of 10 percent of the course fee is deducted from the refund amount.
- Once the 7-day window has passed, the course fee is not refundable. In that case the student may request a one-time transfer to a later batch of the same course.

How to request a refund

- Email the support team with the subject 'Refund Request'.
- Include the student ID, the full name, the course name, the payment receipt and the reason for the refund.
- The support team reviews the request and replies within 3 working days.

Refund timeline and method

Approved refunds are returned to the original payment method within 7 to 10 working days from the date of approval. The time taken to show in the bank statement depends on the bank.

Cases with a full refund

- The institute cancels a course or a batch. The full fee is refunded, or the student may choose another batch or course.
- A duplicate payment or an excess payment made by mistake.
- A payment that was deducted from the bank but not recorded as PAID, after the support team verifies it.

Non-refundable items

- Course fees after the 7-day refund window.
- Fees of courses where more than 2 live sessions have been attended.
- Third-party certification exam fees, if any, paid through the institute.

Refund status

A student who has already requested a refund can ask for the refund status by sharing the student ID. The status of the payment record can be checked through the payment records, and the support team confirms the refund progress.

6. Attendance, Certificate and Recording Policies

Attendance policy

A minimum of 75 percent attendance is required to receive the course completion certificate.

Certificate policy

- The course completion certificate is issued after the student completes the course, submits the assignments and the final project, and scores 60 percent or more.
- The certificate is issued as a digital PDF within 10 working days after course completion.
- Pending fees must be cleared before the certificate is issued.

Recording policy

Recorded sessions are available on the LMS for 6 months after the course ends. Recordings are for the personal use of enrolled students and must not be shared.

Placement support

Placement support includes resume building, LinkedIn profile review, mock interviews and job referrals. It is provided to students who have completed the course with the required attendance and cleared all fees. Placement support is assistance, and a job is not guaranteed.

7. Platform and Service Status

Students use the following online services. The support assistant can check their live status.

- LMS Portal: used for live class links, recordings, assignments, study material and certificates.
- Payment Gateway: used for paying fees online through UPI, cards and net banking.
- Video Streaming: used to play live class recordings on the LMS.

If a service is down or not working

- Check the live service status with the support assistant.
- If a service is reported DOWN or DEGRADED, wait 15 to 30 minutes and try again. The technical team is usually already working on the issue.
- Try a different browser, clear the browser cache, or check your internet connection.
- If the problem continues for more than 1 hour, contact the support team with a screenshot and your student ID.
- Scheduled maintenance, if any, is announced by email and on the LMS in advance.

8. Support and Contact Details

- Support email: support@psgitsolutions.example
- Support phone and WhatsApp: +91 00000 00000
- Support hours: Monday to Saturday, 9:30 AM to 6:30 PM IST. Closed on Sundays and public holidays.
- Response time: emails are answered within 1 to 2 working days. Urgent payment or LMS access issues are handled first.
- For admissions and demo classes, use the same email and phone, and mention the course name.

9. Frequently Asked Questions

Which courses does PSG IT Solutions offer?

DevOps with AWS, DevOps with Azure, DevOps with GCP, Python Programming, Generative AI, Agentic AI with LangGraph, Data Science with Python, Docker and Kubernetes, Terraform, Linux and Shell Scripting, and Full Stack Development with Python. More courses are added regularly.

Is there a free demo class?

Yes. Contact the support team to book a free demo session.

What is the refund policy?

Refunds are accepted within 7 days of enrolment if no more than 2 live sessions were attended. A 10 percent administrative fee is deducted. See section 5 for full details.

Can I pay the fee in instalments?

Yes. The fee can be paid in 2 or 3 instalments.

My payment failed but money was deducted. What should I do?

The bank automatically reverses the amount within 5 to 7 working days. If it is not reversed, contact the support team with the transaction details and your student ID.

Do I get recordings if I miss a class?

Yes. Every live session is recorded and available on the LMS for 6 months after the course ends.

Can I change my batch?

Yes, once, within the first 2 weeks of the course.

Do I need programming knowledge for the DevOps courses?

Basic Linux and one programming language are recommended. Python Programming and Linux and Shell Scripting can be taken first.

Which course should I take to start with Agentic AI?

Start with Python Programming, then Generative AI, then Agentic AI with LangGraph.

10. About the Student Support Assistant

The PSG IT Solutions Student Support Assistant is built with Python and LangGraph. Every question is first read by a classifier node, which sends it to the right node:

- Payment questions about a student's own fees, dues, payment status or failed transactions go to the Database node, which looks up the payment records using the student ID.
- Course questions about courses, fees list, duration, prerequisites, certificates, attendance and policies (including the refund policy) go to the RAG node, which searches this handbook.
- Service status questions about the LMS Portal, Payment Gateway or Video Streaming go to the API node, which checks the live status.
- General questions, greetings and everything else go to the General node.

All four nodes pass their information to the Answer node, which writes the final reply to the student. For account-specific problems that the assistant cannot solve, students are asked to contact the support team.
